-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by de Fontenay.

Re claims 1 and 21, Brenner et al. disclose a hydraulic including a journal bearing (3) and a supporting bearing (4) which are joined by a spring body (2) made of a rubber elastic material and border on at least one working space (5) and at least one compensating space (6), the working space and the compensating space being each filled with a damping fluid and communicating through a damping device (1) in a fluid-conducting manner, wherein, in response to relative displacement of the journal bearing and the supporting bearing with respect to one another, the damping device has damping fluid flowing through it wherein the damping device (1) is formed by a partition between the working space and the compensating space and the partition has at least one radially extending damping channel (8,9, Figure 2).

Re claim 2, see Figure 2.

Re claims 3-4, see Fig. 4.

Re claims 19 and 20, see membrane 7 in Fig. 1.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Fontenay.

Re claims 5-10, de Fontenay does not teach wherein the working space has at least one variable volume fluid pocket extending in the axial direction. Brenner et al. teaches wherein a working space has at least one variable volume fluid pocket extending in an axial direction. See pocket 3a in Fig. 1 and 4a.

Response to Arguments

5. Applicant's arguments with respect to claims 1-10 and 19-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (703)305-0293. The examiner can normally be reached on Monday-Friday, 6:30 AM - 4:00 PM.
